## Capabilities Statement

---

CLK Pro Group represents Machine Shops that serve the automotive, railroad, electrical, textile, and other industries. We proudly offer high-quality CNC milling and turning, metal fabrication, powder coating, production runs, and many other custom solutions. Our state-of-the-art equipment, in-depth knowledge and experience, strong customer service, and dedication to the quality delivered by CLK Pro Group are unmatched and provide customers with exceptional service and outstanding results.

CLK Pro Group is capable of handling short and long-run production projects, turning and milling, metal fabrication, sheet metal cutting, powder coating, black oxide coatings, grinding, sanding, and press operations. For companies with "irregular jobs" that others turn away, we have a solution with our ability to create customer-specific machinery that is specifically tailored to our customer's needs. We design and build directly from the client's pictures and/or specifications and drawings.

## Core Competencies

---

- CNC Turning & Milling
- Metal Fabrication
- Vertical and Horizontal Machining
- Flat Sheet Metal Cutting and Fabrication
- Welding & Cutting
- Powder Coating, Heat Treating, Zinc & Yellow Chromate Plating
- Metrology Capabilities
- Customer Specific Machinery

## Differentiators

---

CLK Pro Group represents machining companies that maintain 25,000 to 50,000 square feet of manufacturing space. Staffing for the past 10 years of 20 FT shop employees. Our represented shops serve the following industries: Automotive, Electrical, Railroad, Gear Boxes, Textile, Mining, Waste Management and more. With CNC Turning Centers (live and bar fed), Machining Centers, Bandsaws, Measuring Equipment, Electroless Plating, etc. We are prepared to handle almost any job our customers need done.
